

Asbestos containing materials (ACM) and lead-based paints (LBPs) are a significant concern during construction, demolition, and remediation projects, and require the expertise of qualified and experienced professionals to safely and successfully address the problem. EnSafe offers comprehensive asbestos- and lead-related services for clients in the public and private sectors, including asbestos and lead assessments, operations and maintenance planning, abatement design, and industrial hygiene services. EnSafe helps clients across the country to assess and manage asbestos and lead in structures undergoing renovation and demolition. EnSafe's asbestos and lead team also has the experience and knowledge to help contractors sort through the myriad of compliance and liability issues associated with performing ACM and LBP abatement and facility maintenance.

creative thinking. custom solutions.

ACM INSPECTIONS/ ASSESSMENTS

- Facility ACM and LBP Inspection and Bulk Sampling Surveys
- 3-Year AHERA Inspections & Periodic Surveillance
- OSHA Compliance Assessments
- Pre-Demolition Hazardous Material Surveys

ASBESTOS AIR SAMPLING

- Personal Air Sampling
- Background/Area Sampling
- Clearance Air Sampling

EXPERT WITNESS TESTIMONY

ASBESTOS AWARENESS TRAINING

THIRD PARTY OVERSIGHT

- Competent Persons
- Occupational Safety and Health Administration and Asbestos Hazard Emergency Response Act (AHERA) Consultation
- Abatement Contractor Oversight
