

STRATEGY IS EVERYTHING

ENSAFE

EXPERTS

EnSafe has presented or advised on over **25** Brownfields-related councils, abstracts, and training sessions nationwide.

Poorly planned programs might check the box of identifying and assessing Brownfields property; however, a strategically planned Brownfields program will provide community benefits by attracting additional funding to support community needs and create opportunities.

GRANT VS PROGRAM FOCUSED

GRANT FOCUSED

PROGRAM FOCUSED

Site-specific partnerships

Focused on success of individual projects

Limited leveraging of alternative funding

Schedule bound by grant cycle

Prioritizes sites that align with city and neighborhood strategic revitalization plans

Grows capacity of program through expanded network of resources

Expanded schedule to promote continued work

Leverages diversified funding sources

We've learned just how powerful a tool the USEPA's Brownfields Program is for leveraging additional funding. That means your grant turns into SEED money.

We've honed an impressive library of work plans, H&S plans, QAPPs and reporting templates that have been reviewed and approved by USEPA. That means time and money saved.

We're nationally recognized brownfields experts. The experts the experts call for training. That means leading edge brownfields thinking.
