

Our Core Competencies Leveraged for Your Strategic Success

EnSafe Inc.'s environmental, health, and safety (EHS) outsourcing clients find that, by divesting non-core activities, they are able to free resources to focus on areas of competitive advantage and differentiation. EnSafe's experienced, qualified health and safety professionals become your onsite partners, whether for planned outages, maintenance activities, renovations, or demolitions. EnSafe provides EHS outsourcing support ranging from one day a month for specific tasks to year-round, full-time for general EHS support.

ROLES SERVED

- Acting site EHS Lead during talent search/hiring process (typically 3-6 months)
- Business Unit Support/EHS Specialist/Site Support (full time, long term)
- Site Compliance Specialist (full-time technical specialist (handling waste management, air compliance, contractor safety program coordinator, H&S, etc.)
- Full-time Contractor Coordinator
- Part-time EHS staff support (e.g. 1-3 days per week X months) to supplement site staff for general support or specific tasks
- Full-time Task-Based Support (to work around site issues with "full-time contractor headcount" restrictions, but where full-time support is needed)

OUTSOURCING BENEFITS

- Predictable Cost** — Planned staff augmentation for a fixed annual fee allows organizations to incorporate EHS costs into their budgets and eliminate uncertainty.
- Quality** — EnSafe's diverse, knowledgeable EHS professionals create quality, comprehensive programs.
- Commitment** — EnSafe offers the resource capabilities of our entire staff & dedication equivalent to an onsite EHS manager.
- Cost-Savings** — Supplementing with outsourced professionals eliminates the need to pay additional employee benefits.

creative thinking. custom solutions.
