

## REMEDICATION & ENVIRONMENTAL SERVICES

"When Safety & Performance Matter"

# COVID-19 DECONTAMINATION SUPPORT SERVICES

GR2 is a wholly owned subsidiary of EnSafe, specializing in facility decommissioning, remedial construction, demolition, abatement, and other civil construction services, with a focus on quality, customer service, and safety. GR2's project approach allows us to successfully service our clients across the U.S. in a variety of industries and locations with a strong focus on quality, customer service, and safety.

### TRAINED AND EQUIPPED

GR2's trained staff are uniquely suited for these types of projects, having both the necessary equipment (including Personal Protective Equipment [PPE]) and the experience from performing numerous industrial facility decontamination projects.

### DISINFECTION

GR2's disinfection process adheres to CDC guidelines and standard operating procedures for:

- Manufacturing facilities
- Offices buildings
- Common areas
- Vehicles
- Churches
- Retail operations

### CONTAMINATED BUILDING SERVICES

Staff and PPE required to access buildings/locations that have been contaminated, including but not limited to:

- Entering the building, disinfecting waste containers, and moving them out to a truck
- Disinfecting and moving equipment to a "clean" area
- Fit testing employees under client-specific respiratory programs

### COLLECTION & DISPOSAL OF CONTAMINATED MATERIALS

If assessment recommendations include disposal of items that cannot be decontaminated, GR2 can properly collect and dispose of contaminated materials.

### Why GR2?

- Full-service, properly trained team
- Proper equipment (PPE)
- Decommissioning experience in wide range of industries
- Extensive understanding of how to meticulously and systematically decontaminate industrial facilities
- Strong regulatory knowledge base
- Emphasis on client's business continuity
