

# HAZARDOUS MATERIALS TRANSPORTATION COMPLIANCE

Complete Solutions for Training and Ongoing Compliance

Since 1980, EnSafe has provided Hazardous Materials (HAZMAT) Transportation consulting and training services to clients worldwide. In the 1980s, EnSafe helped a fast growing package delivery company, Federal Express, establish a dangerous goods training program for its customers nationwide. Since U.S. Environmental Protection Agency hazardous waste regulations were codified, EnSafe has helped clients comply with U.S. Department of Transportation (USDOT) HAZMAT regulations for shipping hazardous wastes. EnSafe created an internal HAZMAT training and auditing program for General Electric and created shipping procedures for a national chemical distributor.

creative thinking. custom solutions.
