

Seasoned expertise for your specific needs

EnSafe process safety management (PSM) experts bring the know-how you need to safely manage highly hazardous chemical processes and maintain compliance with Occupational Safety and Health Administration (OSHA) and U.S. Environmental Protection Agency (USEPA) requirements. EnSafe has experience providing PSM support services to a broad range of industries and clients. We bring a deep understanding of OSHA and USEPA standards regulating the safe operation of highly hazardous chemical processes. Let EnSafe put our expertise to work for you to safely manage your PSM and Risk Management Plan (RMP) covered processes and maintain compliance with OSHA and USEPA requirements.

creative thinking. custom solutions.

ORGANIZATION OF PROCESS SAFETY INFORMATION (PSI)

We compile and organize your PSI related to process chemicals, equipment and technology.

COORDINATION OF PROCESS HAZARD ANALYSES (PHAs)

EnSafe's trained PHA Leaders coordinate execution of initial PHAs and revalidation of existing PHAs.

DEVELOPMENT OF OPERATING PROCEDURES & PSM PROGRAMS

EnSafe develops site-specific PSM program documents and operating procedures.

APPLICABILITY REVIEWS

EnSafe reviews your process and determines if it is covered under the PSM standards.

COMPLIANCE AUDITS

EnSafe's audits verify compliance with OSHA and USEPA requirements utilizing effective checklists augmented with seasoned expertise. We interview facility personnel (both management and line employees) involved with routine, non-routine, and emergency operations associated with the PSM/RMP-covered processes and compare facility programs and practices with best practices across a wide range of industries.

TRAINING OF OPERATORS & MAINTENANCE PERSONNEL

EnSafe provides training to employees regarding the PSM program, process hazards, safe work practices, emergency operations, and mechanical integrity procedures.
