

Recognized Experts Since RCRA's 1980 Promulgation

EnSafe Inc. is a leader in providing environmental compliance and remediation services under the Resource Conservation and Recovery Act (RCRA). Within months of its founding in 1980, EnSafe established a reputation for expert knowledge of the extensive, new RCRA regulations and a variety of related environmental and worker safety issues. EnSafe was one of the U.S. Navy's first RCRA compliance consultants, serving the Naval Facilities Engineering Command (NAVFAC) Southeast since 1981 and NAVFAC Atlantic since 1985. Similar services under RCRA have been provided to private-sector clients, some of whom have been with EnSafe since its founding in 1980.
