

Spill Prevention, Control, and Countermeasure (SPCC) Plan and Program Development

EnSafe has extraordinary experience and a proven track record in helping clients enhance oil spill prevention practices, facilities management, and response preparedness in commercial, industrial, and government sectors. EnSafe, as a prime contractor to the Defense Logistics Agency (DLA) Energy, provides training and spill prevention and response planning services to all military branches and related fuel management facilities and industrial complexes worldwide.

Our experience spans small sites housing only a few tanks to large fuel terminals and complex industrial facilities, including utilities and petroleum refineries, comprising up to several thousand regulated elements. EnSafe is in a unique position to integrate cross business sector lessons learned and best management practices to ensure our clients receive best-in-class services and proven and cost-effective solutions.

creative thinking. custom solutions.

Extensive experience in a variety of industrial, commercial, and government settings in:

- Facility conformance evaluation
- SPCC program development, training, & exercises

INVOLVED SINCE PROGRAM INCEPTION

EnSafe has been involved in over 1,500 SPCC plan projects in support of the revised SPCC ruling and approximately 2,500 total SPCC plans since program inception.

INSPECTION & MAINTENANCE PROGRAM DEVELOPMENT

Protocols based on industry standards for tanks, piping systems, transfer facilities, and supporting infrastructure

Facility-specific inspection forms and schedules

Fit-for-purpose functional plans

Facility-focused and user friendly format

Stand-alone contingency response plan (Red Plan)

Innovative geographic information systems (GIS) technology

FACILITY CONFORMANCE EVALUATION

Management and operational practices
Storage tank/container technical integrity
Inspection and maintenance programs
Transfer operations, piping, and pump systems

Bulk product pipelines

Facility drainage provisions

Emergency response capabilities

TRAINING

Spill prevention practices

Inspection and maintenance protocols

Spill response procedures

Tabletop and functional field-related spill response exercises

Technical Expertise

Registered Professional Engineers (PEs)
Facility evaluations using GIS-based tools
Petroleum industry professionals on staff
Experience in nearly every state/territory

Clients

DLA Energy and DoD (Air Force, Army, Marine Corps, National Guard, Navy)

Alcoa

Ergon

Helena Chemical

Pasminco Zinc

Premcor Refining

W.M. Barr
