

# WATER UTILITY INDUSTRY EXPERTISE

EnSafe understands the various environmental, safety, and emergency compliance and best practices necessary for the treatment, transmission, and distribution of water service to your customers. In addition, we understand the applicable compliance standards and best practices for all the auxiliary services, facilities, and processes necessary to keep the business operating.

## OUR SERVICES:

- Provide Regulatory Interpretation and Guidance
- Develop Written Procedures and Compliance Programs
- Develop Classroom, Remote, and Hands-On Training Programs
- Conduct Compliance Audits and Inspections
- Leverage Readily Available Technologies to Provide Field Data Collection and Inspection Tools for Staff

## KEY DIFFERENTIATORS:

- We understand utilities, working in many roles similar to your utility, so we provide solutions that work for construction, operations, maintenance, and engineering functions.
- Although we have best practice documents as a template, everything we develop is customized to your site-specific practices.
- We want to be a long time partner – providing onsite consulting services or equipping your onsite EHS staff to take the lead.
- We know the requirements, best practices in the utility industry, and the most effective ways to ensure compliance with federal, state, and local regulations.
- We understand the sensitivity of litigation and non-compliance situations and have significant experience in regulator interactions, regulatory inspections, risk management, and litigation situations.

## AREAS OF FOCUS:

We have expertise in all Occupational, Safety, and Health Administration, Environmental Protection Agency, and state regulations as applicable to utilities:

### ENVIRONMENTAL

- Program development, permitting, reporting, audits, and training
  - Waste Characterization and Disposal
  - Chemical Management and Spill Response
  - Stormwater Pollution Prevention
  - Risk Management
- Remedial Investigations and Closure Plan Development

### WORKER HEALTH & SAFETY

- Program and procedure development, assessments, audits, and training
  - Lockout/Tagout
  - Machine Guarding
  - Process Safety Management (PSM)
  - Confined Spaces
  - Respiratory Protection
  - Fall Protection
  - Chemical Hygiene
  - National Fire Protection Association (NFPA) 70E
  - Powered Industrial Trucks
  - Asbestos-Containing Materials
  - Lead-Based Paint Containing Materials
  - Industrial Hygiene
  - Job Hazard Analysis
  - Excavation Safety
- Incident Investigations
- Contractor Pre-Qualification
- Behavior-Based Safety Program

### EMERGENCY PREPAREDNESS

- Exercise development and deployment
- National Incident Management System implementation
- NFPA 1660 Emergency, Continuity, and Crisis Management Standard compliance
- America's Water Infrastructure Act
